

Deliver uninterrupted learning

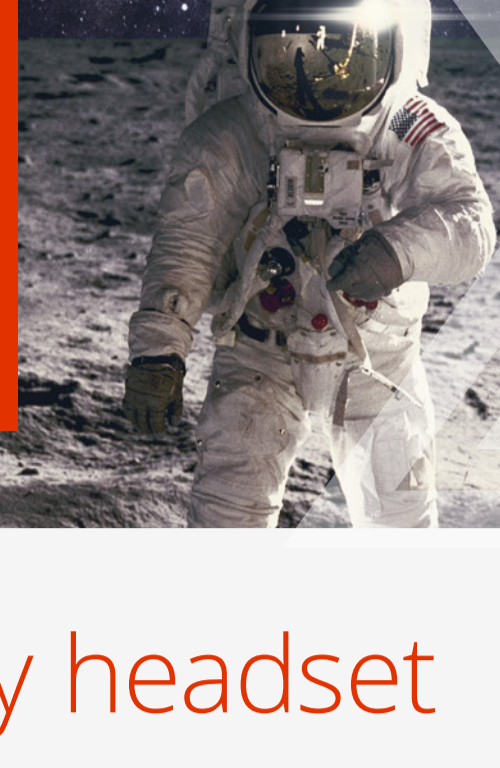

Upgrade the hybrid classroom with XMA and Poly

Where we teach, inspire and collaborate is no longer confined to the classroom. Make meaningful connections – no matter where you're located – with the right audio and video equipment. As partners with Poly, leaders in video and voice solutions for more than 50 years, XMA can give hybrid-learning the tools to teach and learn from any location.

Here's how Poly's video and voice devices can support collaboration...

Did you know?

Poly has been connecting people remotely for over 50 years. **Neil Armstrong** and **Buzz Aldrin** took a **Poly headset** with them when they travelled **to the moon** in 1969.

Stay focused with a Poly headset

Remote learning can mean long hours on voice and video calls. Poly headsets provide pro-grade acoustics and all-day comfort, giving teachers the tools to get their message across and enabling students to listen without distraction.

Bluetooth® connectivity
Giving you the freedom to move

Acoustic Fence technology
Eliminating background distractions

Multiple device compatibility
For seamless hybrid learning

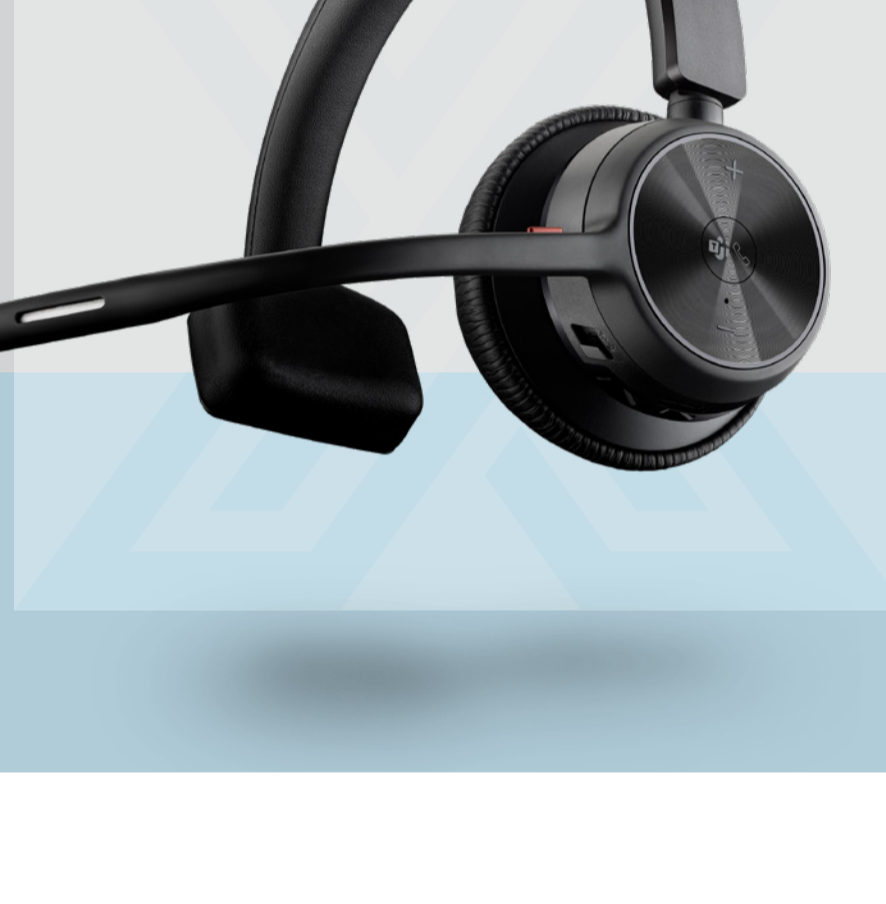

51% report daily video usage

86% experience background noise while working at home

4.1 devices are used during the working day
