

Jumpstart your ChromeOS Pilot

Uncover its benefits for the public sector with XMA

Our ChromeOS Pilot is a simple way to trial an innovative new OS for your organisation's tech, without committing to a complete rollout.¹ By using existing devices, you could get **40 Enterprise Upgrade licences for £1600**.

Standard deployment includes:

Platform

- 40 annual ChromeOS management licences
- 40 ChromeOS Flex Windows / Mac devices

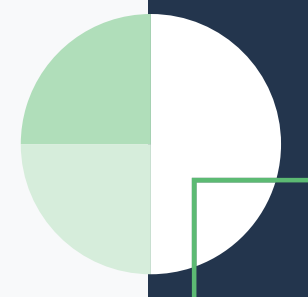

Configuration

- Google Admin Console set-up
- Device, user, and network policies
- Application deployment

Enablement

- **One day** admin training
- **One day** staff enablement

The steps A simple route to an intuitive OS

Phase one: Kick off

We identify your organisation's challenges and establish success criteria, defining any customisations and sourcing complementary software if needed.

Phase two: Demo

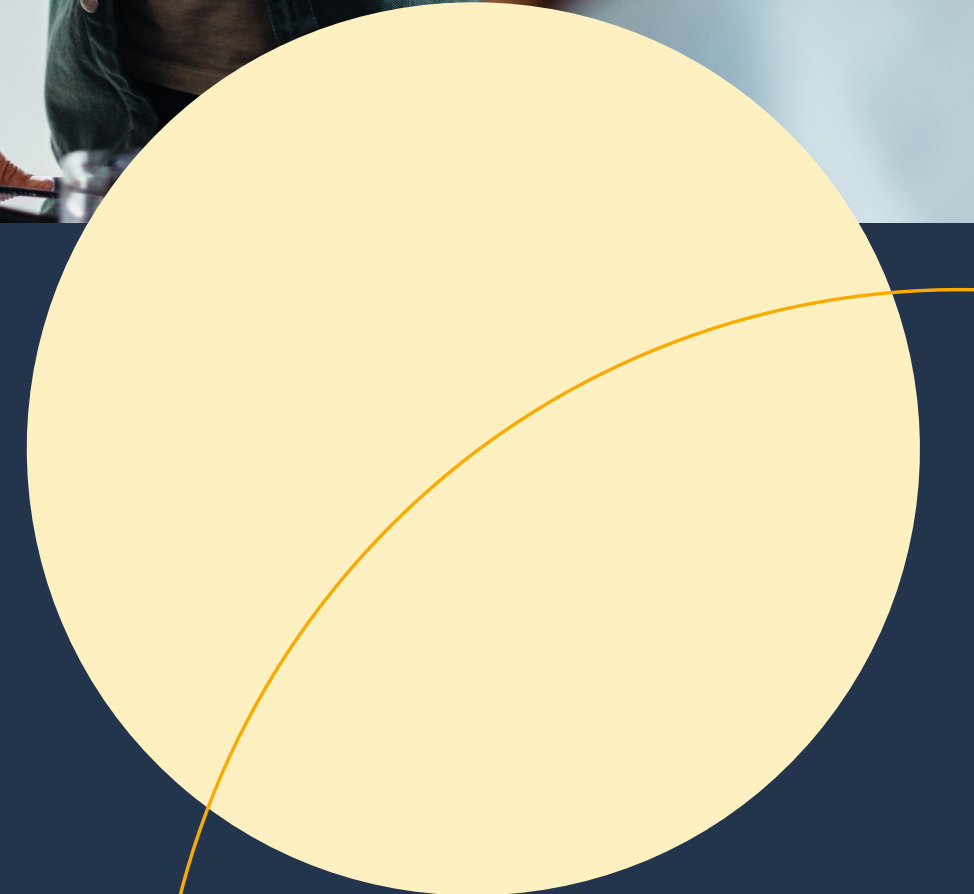

We provide a remote or on-site tailored demonstration of user experience and admin configuration.

Phase three: Proposal

Once the solution is validated and your success criteria have been met, we'll create a deployment proposal for the 40 pilot licences.

Phase four: Deployment

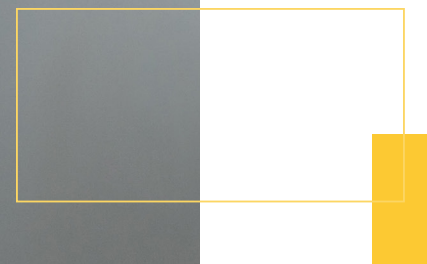

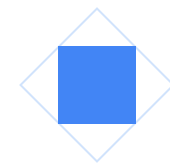

We'll help you configure Google Admin Console and user, device, and network policies. Plus, we'll assist with app deployment, device enrolment and ChromeOS Flex if needed. We'll even provide one day of admin training for your teams.

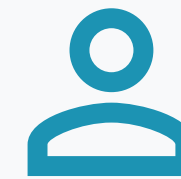

Spotlight: ChromeOS for Libraries

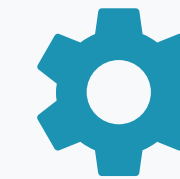

ChromeOS has benefits for the whole public sector. But for libraries, it can be especially transformative – seamlessly updating tired devices with secure, cost-effective technology.

The benefits

Improved citizen experience

Set and forget configuration

Cost-saving upgrades

46% less energy use

Computer and print management tools

Automated, self-serve device loan processes

Library management integration

Built-in security

XMA – delivering your perfect pilot

Our extensive public sector experience and outcomes-focused approach mean we can develop a pilot that addresses your organisation's unique needs. And our end-to-end services provide support for every phase – from initial plans to successful deployment.

Register for the pilot today to give your tech a jumpstart.
