

# End User Device Carbon Impact Assessment Service

## Highlights

**Empower Efficiency** — Assess your EUD carbon footprint.

**Optimise Devices** — Reduce energy usage and minimise your environmental impact.

**Proactive Sustainability** — Use data-driven decision making for smarter asset management.

## Introduction

Aligned with our commitment to sustainability, our End-User Device (EUD) Carbon Impact Assessment Service provides real-time data on application and device performance to help organisations reduce their carbon emissions.

The service enables End User Device service and support teams to gain insights on some of the common questions including:

- Are we unknowingly contributing to climate change through unused and idle devices?
- What if lowering our carbon footprint could be achieved with a simple adjustment?
- Could our organisation be missing a hidden opportunity to reduce energy consumption?

## Methodology

Our EUD Carbon Impact Assessment Service leverages advanced monitoring technology, we analyse device usage patterns, revealing the true impact on your carbon footprint. This empowers you to make data-driven decisions that optimise efficiency, empower sustainable practices, and minimise your environmental impact.

### ▶ Discover

The purpose of the initial workshop is to understand the business context, including:

- Identifying your strategic and ESG drivers.
- The current landscape state and objectives.
- Timelines and engagement mode.

### ▶ Define

During subsequent workshop(s) our specialists will work with you to:

- Analyse the End-User Device Carbon Footprint of your estate and provide sustainability metrics.
- Understand the energy usage by Idle Devices and provide estimated cost of electric consumption.

### ▶ Recommend

The output of this activity is a concise roadmap that includes:

- Utilise your sustainability metrics to make data-driven decisions leading to a smarter asset management..
- Identify areas of your environment where you can quickly save cost by reducing electricity consumption.
