

# Jumpstart your ChromeOS Pilot

## Uncover its benefits for your organisation with XMA

Our ChromeOS pilot is a simple way to trial an innovative new OS for your organisation's tech, without committing to a complete rollout.<sup>1</sup> By using existing devices, you could get **50 Enterprise Upgrade licenses for £2,000.**

## The Steps A simple route to an intuitive OS

### 1 Phase One: Kick Off

We identify your organisation's challenges and establish success criteria, defining any customisations and sourcing complementary software if needed.

### 3 Phase Three: Proposal

Once the solution is validated and your success criteria have been met, we'll create a deployment proposal for the 50 pilot licences.

### 2 Phase Two: Demo

We provide a remote or on-site tailored demonstration of user experience and admin configuration.

### 4 Phase Four: Deployment

We'll configure your Google Admin Console and user, device, and network policies. Plus, we'll assist with app deployment, device enrolment and ChromeOS Flex if needed. We'll even provide one day of admin training for your teams.

## Standard deployment includes:

### Platform

- 50 annual ChromeOS management licences
- 50 ChromeOS Flex Windows / Mac devices

### Configuration

- Google Admin Console set-up
- Device, user, and network policies
- Application deployment

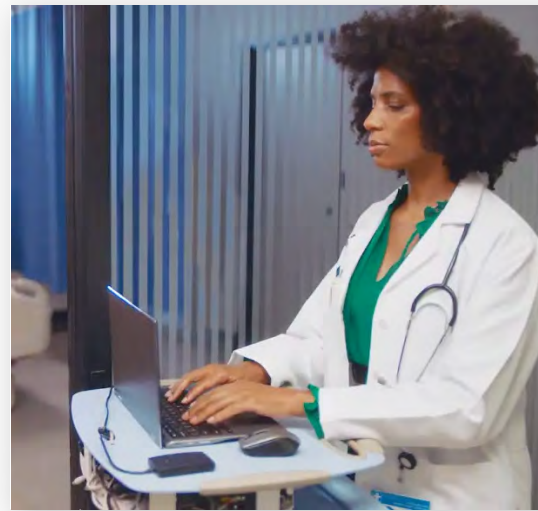

### Enablement

- One day admin training and staff enablement

## Explore the potential of ChromeOS

### Walk down the streets of our Digital Council

Visit our digital world to see how XMA and ChromeOS are making life better for citizens and public sector workers, then leave with inspiration for your own local authority.

### ChromeOS has the power to bridge the digital divide

By partnering with us and using Google ChromeOS Flex, Framework Housing Association transformed outdated devices into powerful tools for their residents. This inspiring project bridged the digital gap and led to inspiring outcomes.

*"It was definitely the right decision to kick start our journeys towards tackling digital exclusion."*

-Kevin Rookes, Digital Inclusion Co-Ordinator
